Data Scientist

Data Scientist with 5+ years of experience in machine learning, data analysis, and predictive modeling. Adept at using Python, SQL, and TensorFlow to extract insights from complex datasets and drive data-informed decisions.

Technical Skills

Python, SQL, TensorFlow, Machine Learning, Data Analysis, Predictive Modeling, Tableau

Soft Skills

Problem-Solving, Critical Thinking, Communication, Teamwork, Adaptability

Experience

Data Scientist — Tech Solutions S.A. (Mar 2020 – Present)

- Developed and implemented machine learning models to predict customer churn, improving retention rates by 20%.
- Collaborated with cross-functional teams to identify and analyze trends in large datasets, leading to a 15% increase in sales.
- Created interactive dashboards using Tableau to visualize key performance indicators for stakeholders.
- Optimized SQL queries to reduce data retrieval time by 30%.
- Mentored junior data scientists, providing guidance on best practices and coding standards.

Data Analyst — Data Insights Inc. (Jun 2017 – Feb 2020)

- Conducted exploratory data analysis to uncover insights and support business decisions.
- Developed and maintained reports and dashboards to track key metrics and performance indicators.
- Worked closely with the marketing team to segment customers and target specific groups with personalized campaigns.
- Automated data cleaning and preprocessing tasks, reducing manual effort by 40%.
- Presented findings and recommendations to senior management, influencing strategic decisions.

Education

Master of Science in Data Science — Universidad Politécnica de Madrid (2017)

Bachelor of Science in Computer Science — Universidad Complutense de Madrid (2015)

Languages

Spanish (C2), English (B2)
