Data Engineer

Data Engineer with 7+ years of experience in designing, building, and maintaining robust data pipelines. Proven track record in optimizing data workflows and driving data-driven decision-making. Strong background in data warehousing, ETL processes, and big data technologies.

Technical Skills

SQL, Python, Java, Spark, Hadoop, Hive, Kafka, Airflow, AWS, GCP, Data Modeling, Data Warehousing, ETL Processes

Soft Skills

Problem-Solving, Attention to Detail, Team Collaboration, Communication, Time Management

Experience

Senior Data Engineer — DataInsights Ltd. (Jan 2020 – Present)

- Lead a team of 5 data engineers in designing and implementing scalable data solutions, resulting in a 30% increase in efficiency.
- Architected and deployed a real-time data pipeline using Kafka and Spark, reducing data latency from hours to minutes.
- Collaborated with data scientists to optimize machine learning models, improving prediction accuracy by 20%.
- Mentored junior team members, conducting regular training sessions and code reviews to foster professional growth.
- Developed and maintained CI/CD pipelines, ensuring seamless deployment and integration of data services.

Data Engineer — TechSolutions Inc. (Mar 2016 – Dec 2019)

- Designed and implemented ETL processes using Apache NiFi, reducing data extraction time by 40%.
- Managed and optimized data storage solutions on AWS Redshift, leading to a 25% cost reduction.
- Developed custom Python scripts to automate data validation and quality checks, ensuring data integrity.
- Worked closely with business analysts to translate data requirements into technical specifications.
- Participated in on-call rotations, providing timely support and troubleshooting for data-related issues.

Education

MSc in Data Science — University of Porto (2015)

BSc in Computer Science — University of Lisbon (2013)

Languages

English (C2), Portuguese (C2), Spanish (B1)
