QA Engineer

Detail-oriented QA Engineer with 7 years of experience in software testing and quality assurance. Proficient in designing and executing test plans, with a strong background in automation testing. Passionate about ensuring high-quality software products.

Technical Skills

Test Automation (Selenium, Appium), Test Management (JIRA, TestRail), Performance Testing (JMeter, LoadRunner), API Testing (Postman, RestAssured), SQL, Git, Agile/Scrum

Soft Skills

Analytical Thinking, Attention to Detail, Problem-Solving, Team Collaboration, Communication

Experience

QA Engineer — TechSolutions Ltd (Jan 2018 – Present)

- Develop and maintain automated test scripts using Selenium and Appium, reducing manual testing efforts by 40%.
- Create and execute test plans, ensuring comprehensive test coverage and adherence to project requirements.
- Perform performance testing using JMeter and LoadRunner, identifying and addressing bottlenecks to improve system.
- Collaborate with cross-functional teams to define, document, and implement test strategies and processes.
- Design and execute API tests using Postman and RestAssured, ensuring the reliability and functionality of APIs.

Junior QA Engineer — Innovatech Solutions (Mar 2015 – Dec 2017)

- Assisted in the creation and execution of manual test cases, ensuring thorough test coverage and defect identification.
- Supported the development of automated test scripts, contributing to the reduction of regression testing time.
- Participated in test planning and strategy sessions, providing input on test approaches and methodologies.
- Documented test results and defects using JIRA, ensuring clear and concise communication of test outcomes.
- Collaborated with developers and business analysts to understand project requirements and ensure test coverage.

Education

BSc in Computer Science — University of Seville (2014)

Languages

English (C2), Spanish (C1)
